Our Vision

Our vision statement is built around these intentions:

1. To support our clients with integrative strategies for all **'hazard and risk assessment based' regulations** related to the production and use of chemical substances and products
2. **To be seen as the leading experts in the EU related to inorganic risk assessment and biocidal products** regulation
3. **To provide the best working conditions for employees** seeking opportunities to deliver high quality work in an attractive working environment.
4. **To encourage innovative thinking** allowing ARCHE Consultings client to be the first beneficiaries of newly developed concepts and tools.

As a company, we strongly believe that the right person can learn new skills for a specific role, as long as you fit into the company values and culture. ARCHE Consulting employees appreciate the down-to-earth atmosphere, the transparent communication and decision making, the informal way of collaborating as well as the participative and authentic leadership style.

Job description

To support the continued growth of ARCHE Consulting dealing with chemical and product health, safety and environmental programs of multi-national corporations from varied industrial sectors we are looking for a Regulatory Chemical Compliance Consultant (m/f/x) who has relevant experience (2-4 years) in the registration of chemicals under REACH and who would like to join our team in Ghent or Leuven.

The jobholder will be part of an expert team dealing with Chemical compliance. As a Regulatory Chemical Compliance Consultant you will be responsible for:

- providing specialist strategic advice and assist in technical dossier preparation in the framework of REACH,
- assisting companies including strategic support following REACH enforcement audits by authorities,
- remaining aware of updates in regulatory guidance,
- communicating with clients and regulatory authorities if necessary.

Your Profile:

Minimum qualifications for this position include:

- 2-4 years of experience with REACH registration procedures and technical knowledge in one of the subsequent fields: hazard, exposure and risk assessment,
- Masters degree in engineering, chemistry and/or related sub-disciplines, (bio)chemistry, (eco)toxicology, environmental & health sciences, or related fields. Having obtained a PhD in sciences (chemistry) is a plus,
- Outstanding oral and written communication skills,
- Fluent in English, a good command of other European languages is a plus.

What do we offer:

- Competitive and flexible salary complemented with additional 'flex income plan'.
- Flexible and dynamic work environment,
- Healthy work-life balance (e.g. partial working from home),
- Attractive company culture (monthly breakfast; weekly sport; yearly teambuilding activities and kids day),
- Internal and external training opportunities (e.g. conferences; training courses),
- International dimension,
- Extra benefits: group insurance (pension plan), bonus encouragement system, hospitalization insurance,
- Career development support,
- Holidays (20 + 12 days).

So, if you already share an honest interest in building a sustainable environment by advising our clients with our niche expertise, then you can surely find enough challenges within ARCHE Consulting. We look forward to welcoming team members who like working on diverse and challenging projects. To stay up-to-date and deliver outstanding solutions we are willing to train, stretch and re-train our employees.

We would love to connect with you if you recognize yourself in this career opportunity.

We are looking forward to receiving your application sent by mail to marnix.vangheluwe@archeconsulting.be
